## LED CIPP CURING SYSTEM

**LESS DISRUPTION. MORE PRODUCTION.**

The MICROcure LED pipe rehabilitation curing system is an all-around solution that works on horizontal and vertical sewer laterals. The LED CIPP technology is designed for inversion installation from 3"-10" and works in tandem with inversion drums or continuous sluices.

Cable reel with 229 feet  
(70 meters) of supply hose

Bendability in 90-degree turns  
as small as 4-inch pipe

Reports can be downloaded  
after each job via USB

## LED CIPP CURING SYSTEM

### CONSISTENT. QUALITY. PERFORMANCE.

MICROcure is an innovative and user-friendly LED system that features a “straight-to-the-point” curing software that provides consistent CIPP rehabilitation performance, and produces necessary documentation. Developed with direct feedback from plumbers and contractors, the MICROcure system was designed with the pro in mind.

#### MICROCURE SYSTEM

| PART NUMBER  | DESCRIPTION  |
|--------------|--|
| MC-3-6SYSTEM | MICROcure LED CIPP Curing Solution Base System - 3"- 6" Pipe |

#### 3" - 6" SYSTEM INCLUDES:

- Cable reel 229' (70m)
- Hose package 229' (70m)
- LED light source - 4 x 100w
- Compressed air refrigeration dryer
- Camera module (*removable*)
- Control panel and video monitor
- Software package
- Hose drive unit
- Y-Pipe - 6" | Y-Pipe Extension
- Supply and accessory cases
- Safety and replacement accessories

#### 8" - 10" SYSTEM UPGRADE:

- LED light source - 8 x 100w
- Wheel-set 8" (DN200)

#### ACCESSORIES
