

TRENCHLESS PIPE REHABILITATION

PipePatch Phoenix System

Heated packer that
saves 50% of cure time

Eliminate infiltration by creating point repairs with the **PipePatch Phoenix Heated Repair System**. By using The Phoenix, your business will save **50% of cure time** and increase total effectiveness during every season. The Phoenix is a packer with an internal heater with control of the hardening process regardless of the outside temperature. The display on the heated control unit shows the actual temperature of the packer, allowing you to regulate the entire cure process and increase daily work capacity throughout the year. Working through summer and winter conditions, its high quality and effectiveness in the field makes The Phoenix unique to the world market and will give your business a competitive edge.
