

## Your 1 Source For Infrastructure & Water Management Solutions

# XSEAL

Creates a strong air tight seal for  
Manhole Frames, Chambers, and Vaults  
*Replaces Butyl Joint Sealants!*

Bonds and seals concrete, metal, plastic, wood  
and pre-cast connections, and expands to fill  
voids and seal all substrates.

X-Seal is a single component, hydrophobic  
polyurethane sealant. It is applied when assembling  
chambers, manhole sections and vaults, creating  
a super-strong and infallible seal.

X-Seal is approved to NSF 61-2007 for contact with potable water.

It can also be used for attaching or adjusting rings and manhole frames to  
the concrete cone. Other uses include:

- Roof Bolts
- Vaults
- Tunnels
- Dams
- Earthen and Concrete
- Slurry Walls
- Concrete Pipe
- Flumes

With the global trend moving toward stricter guidelines and legislation, this  
product provides the peace of mind you need when working with long term  
infrastructure. Simple, low cost, hassle free and guaranteed.

SG-XS20 X-Seal is available in cases of (20) 8 oz. bottles.

*Applying X-Seal to Manhole Ring*

*Setting Manhole Frame on Ring*

*Expands and Creates an Airtight  
Seal in 5 Minutes*

*The Job is Finished*
