

360° OR TOP HAT CIPP TEE AND WYE LATERAL SEAL SYSTEM

CONNECTING FROM THE MAIN TO THE LATERAL

PipePatch TYGER creates a mainline to lateral seal repair, without access to the homeowners property or disrupting live flow in the mainline. PipePatch TYGER mechanically bonds to all pipe types. Once installed, the system forms a smooth transition and may be used in a wide variety of configurations. PipePatch TYGER is designed to extend 6"-10" into the lateral.

BENEFITS

- Based on the foundation of PipePatch®
- Uses PipePatch® Silicate Resin
- Stops infiltration and exfiltration at the mainline and lateral connection
- Consistent ambient cure time
- NO DIG Lateral Seal System does not disrupt mainline service — mainline packer equipped with flow-through
- Minimally invasive 3.5 mm average wall section

TECHNICAL SPECS

- 360° repairs for 4" - 6" laterals and 6" - 12" mainlines
- Top Hat repairs for 4" - 6" laterals in up to a 32" mainline
- Installation methods include, manual push rod system or robotic system
- Pre-packaged kitted system
- Environmentally safe - contains NO VOCs or Styrene
- Exceeds the structural property requirements of ASTM F1216 + F3541
- Certified by NSF, ICC, and IAPMO to the UPC + IPC
