

## **Source One Environmental Announces Partnership with Brawo® Systems to Bring Cutting-Edge Magnavity SX LED Pipe Curing System to North America**

Davison, MI – Source One Environmental (S1E), a Fernco company and leader in providing innovative trenchless solutions across the U.S. and Canada, is proud to announce a new partnership with Brawo Systems, a globally recognized name in trenchless pipe rehabilitation technology. This collaboration marks a significant step forward in showcasing and expanding access to the award-winning Magnavity SX LED Pipe Curing System, positioning it as a transformative solution for the trenchless repair industry under this new partnership.

The Magnavity SX LED Pipe Curing System represents the pinnacle of efficiency, precision, and innovation in LED curing technology. Recently honored with the 2024 Abbott Innovative Product & Services Award, this system has gained acclaim for its compact design, intuitive operability, and enhanced performance. Recognized as a game-changer in the trenchless repair industry, the Magnavity SX continues to set new benchmarks for quality and reliability, making it a standout choice for professionals seeking superior results in pipe rehabilitation projects.

“Partnering with Brawo Systems marks a significant milestone for S1E as we expand our product offerings to meet the evolving needs of our customers,” said Ben McGraw, Vice President of Source One Environmental. “The Magnavity SX exemplifies the type of cutting-edge solutions we strive to bring to the market, ensuring our customers can work more efficiently and effectively than ever before.”

“Brawo Systems are very proud and excited to expand our relationship with S1E to the USA and Canada,” said Andrew Marshall, Sales Manager for Brawo Systems. “After more than five years of successful partnership in the UK, we know S1E is a perfect partnership to grow in North America, while maintaining excellent customer support. Brawo Systems looks forward to working closely with both the American and Canadian S1E teams.”

### **The Magnavity SX LED Pipe Curing System offers an array of benefits, including:**

- Smart features:
  - Exchangeable LED heads with integrated operating hours monitoring.
  - Installation log with mobile interface (USB, W-LAN).
  - Reversible dual camera.
  - Intelligent Plug & Play functionality with automatic recognition of the LED head used.
- Low power consumption with high light output, ensuring energy-efficient operation.
- A lightweight and compact design, enabling seamless transportation and setup.
- Reduces operational complexity by needing only one access point.
- “Turtle” function for safe curing in the inlet area
- Compatibility with a wide range of pipe diameters, catering to diverse rehabilitation needs.

The formal launch of the Magnavity SX LED Pipe Curing System will take place at the highly anticipated 2025 WWETT Show in Indianapolis, IN, running from February 18-20, 2025. Those in the industry will have the opportunity to see the Magnavity SX in person and learn more about its transformative capabilities during this event.
