SAFETY DATA SHEET

SUPRASEC® 9631 (STI 03-0.15-S HYPERFLEX)

SECTION 1. IDENTIFICATION

Product name : SUPRASEC® 9631 (STI 03-0.15-S HYPERFLEX)

Manufacturer or supplier’s details
Company name of supplier : Huntsman Polyurethanes
Address : P.O. Box 4980
The Woodlands,
TX 77387
United States of America (USA)
Telephone : Tech Info:(800) 257-5547
E-mail address of person responsible for the SDS : MSDS@huntsman.com
Emergency telephone number : Chemtrec: (800) 424-9300 or (703) 527-3887

Recommended use of the chemical and restrictions on use
Recommended use : Component of a Polyurethane System.
Restrictions on use : For industrial use only.

SECTION 2. HAZARDS IDENTIFICATION

GHS classification in accordance with 29 CFR 1910.1200
Acute toxicity (Inhalation) : Category 4
Skin irritation : Category 2
Eye irritation : Category 2B
Respiratory sensitisation : Category 1
Skin sensitisation : Category 1
Specific target organ toxicity - single exposure : Category 3 (Respiratory system)

GHS label elements
Hazard pictograms : 
Signal word : Danger
Hazard statements : H315 + H320 Causes skin and eye irritation.
H317 May cause an allergic skin reaction.
H332 Harmful if inhaled.
H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335 May cause respiratory irritation.

Precautionary statements:
Prevention:
P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.
P264 Wash skin thoroughly after handling.
P271 Use only outdoors or in a well-ventilated area.
P272 Contaminated work clothing should not be allowed out of the workplace.
P280 Wear protective gloves.
P285 In case of inadequate ventilation wear respiratory protection.

Response:
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P304 + P340 + P312 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P333 + P313 If skin irritation or rash occurs: Get medical advice/attention.
P337 + P313 If eye irritation persists: Get medical advice/attention.
P342 + P311 If experiencing respiratory symptoms: Call a POISON CENTER/doctor.
P362 Take off contaminated clothing and wash before reuse.

Storage:
P403 + P233 Store in a well-ventilated place. Keep container tightly closed.
P405 Store locked up.

Disposal:
P501 Dispose of contents/container to an approved facility in accordance with local, regional, national and international regulations.

Other hazards
None known.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture: Mixture

Hazardous components

SECTION 4. FIRST AID MEASURES

General advice
Move out of dangerous area.
Do not leave the victim unattended.
Get medical attention immediately if symptoms occur.
Show this safety data sheet to the doctor in attendance.

If inhaled
If breathed in, move person into fresh air.
Call a physician or poison control centre immediately.
Keep patient warm and at rest.
Keep respiratory tract clear.
If breathing is difficult, give oxygen.
If breathing is irregular or stopped, administer artificial respiration.
If unconscious, place in recovery position and seek medical advice.
Consult a physician immediately if symptoms such as shortness of breath or asthma are observed.
A hyper-reactive response to even minimal concentrations of diisocyanates may develop in sensitised persons.
The exposed person may need to be kept under medical surveillance for 48 hours.
LC50 (rat) : ca. 490 mg/m³ (4 hours) : using experimentally produced respirable aerosol having aerodynamic diameter <5microns.

In case of skin contact
In case of contact, immediately flush skin with soap and plenty of water.
Take off contaminated clothing and shoes immediately.
Wash contaminated clothing before reuse.
Thoroughly clean shoes before reuse.
Call a physician if irritation develops or persists.
An MDI study has demonstrated that a polyglycol-based skin cleanser (such as D-TamTM, PEG-400) or corn oil may be more effective than soap and water.

In case of eye contact
Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
If easy to do, remove contact lens, if worn.
Protect unharmed eye.
Keep eye wide open while rinsing.
If eye irritation persists, consult a specialist.

If swallowed
Gently wipe or rinse the inside of the mouth with water.
DO NOT induce vomiting unless directed to do so by a physician or poison control center.
Keep respiratory tract clear.
Keep at rest.
If a person vomits when lying on his back, place him in the recovery position.
Never give anything by mouth to an unconscious person. Take victim immediately to hospital. If symptoms persist, call a physician.

**Most important symptoms and effects, both acute and delayed**

- Severe allergic skin reactions, bronchiospasm and anaphylactic shock
- This product is a respiratory irritant and potential respiratory sensitizer: repeated inhalation of vapour or aerosol at levels above the occupational exposure limit could cause respiratory sensitisation.
- Symptoms may include irritation to the eyes, nose, throat and lungs, possibly combined with dryness of the throat, tightness of chest and difficulty in breathing.
- The onset of the respiratory symptoms may be delayed for several hours after exposure.
- A hyper-reactive response to even minimal concentrations of MDI may develop in sensitised persons.

**Protection of first-aiders**

- No action shall be taken involving any personal risk or without suitable training.
- It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.
- If potential for exposure exists refer to Section 8 for specific personal protective equipment.
- First Aid responders should pay attention to self-protection and use the recommended protective clothing.

**Notes to physician**

- Symptomatic and supportive therapy as needed. Following severe exposure medical follow-up should be monitored for at least 48 hours.
- The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.

**SECTION 5. FIREFIGHTING MEASURES**

**Suitable extinguishing media**

- Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
  - Foam
  - Carbon dioxide (CO2)
  - Dry powder

**Unsuitable extinguishing media**

- Water may be used if no other available and then in copious quantities. Reaction between water and hot isocyanate may be vigorous.

**Specific hazards during firefighting**

- Do not allow run-off from fire fighting to enter drains or water courses.
- The pressure in sealed containers can increase under the influence of heat.
- Exposure to decomposition products may be a hazard to health.

**Hazardous combustion**

- Combustion products may include: carbon monoxide, carbon
products: products, dioxide, nitrogen oxides, hydrocarbons and HCN. In the event of extreme heat (>500 degrees C), aniline is suspected of being formed.

Specific extinguishing methods: Cool containers/tanks with water spray.

Further information: Standard procedure for chemical fires. Due to reaction with water producing CO2-gas, a hazardous build-up of pressure could result if contaminated containers are re-sealed. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Prevent fire extinguishing water from contaminating surface water or the ground water system. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

Special protective equipment for firefighters: Wear an approved positive pressure self-contained breathing apparatus in addition to standard fire fighting gear.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Immediately evacuate personnel to safe areas. Use personal protective equipment. If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Only qualified personnel equipped with suitable protective equipment may intervene. For additional precautions and advice on safe handling, see section 7. Never return spills in original containers for re-use. Make sure that there is a sufficient amount of neutralizing/absorbent material near the storage area. The danger areas must be delimited and identified using relevant warning and safety signs. Treat recovered material as described in the section "Disposal considerations". For disposal considerations see section 13.

Environmental precautions: Do not allow uncontrolled discharge of product into the environment. Do not allow material to contaminate ground water system. Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. Local authorities should be advised if significant spillages cannot be contained. If the product contaminates rivers and lakes or drains inform respective authorities.

Methods and materials for containment and cleaning up: Clean-up methods - small spillage. Contain spillage, soak up with non-combustible absorbent.
material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13).
Clean contaminated surface thoroughly.
Sweep up or vacuum up spillage and collect in suitable container for disposal.
Neutralize small spillages with decontaminant.
The compositions of liquid decontaminants are given in Section 16.
Remove and dispose of residues.

Clean-up methods - large spillage
If the product is in its solid form:
Spilled MDI flakes should be picked up carefully.
The area should be vacuum cleaned to remove remaining dust particles completely.
If the product is in its liquid form:
Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).
Leave to react for at least 30 minutes.
Shovel into open-top drums for further decontamination.
Wash the spillage area with water.
Test atmosphere for MDI vapour.
Keep in suitable, closed containers for disposal.

SECTION 7. HANDLING AND STORAGE

Technical measures: Ensure that eyewash stations and safety showers are close to the workstation location.
Local/Total ventilation: Use only with adequate ventilation.
Advice on protection against fire and explosion: Normal measures for preventive fire protection.
Advice on safe handling: For personal protection see section 8.
Avoid formation of aerosol.
Do not breathe vapours or spray mist.
Do not breathe vapours/dust.
Do not swallow.
Do not get in eyes or mouth or on skin.
Do not get on skin or clothing.
Avoid exposure - obtain special instructions before use.
Smoking, eating and drinking should be prohibited in the application area.
Provide sufficient air exchange and/or exhaust in work rooms.
Keep container closed when not in use.
Open drum carefully as content may be under pressure.
Dispose of rinse water in accordance with local and national regulations.
Persons susceptible to skin sensitisation problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.

Conditions for safe storage: Keep containers tightly closed in a dry, cool and well-ventilated
Keep in properly labelled containers.
Observe label precautions.
Protect from moisture.
Electrical installations / working materials must comply with the technological safety standards.
Containers which are opened must be carefully resealed and kept upright to prevent leakage.

Materials to avoid:
- Acids
- Amines
- Bases
- Metals
- Water

Further information on storage stability:
Stable at normal ambient temperature and pressure.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Personal protective equipment

Respiratory protection:
Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.
Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
In emergency, non-routine and unknown exposure situations, including confined space entries, a NIOSH-certified full facepiece pressure demand self-contained breathing apparatus (SCBA) or a full facepiece pressure demand supplied air respirator (SAR) with auxiliary self-contained air supply, should be used.

Hand protection:
The suitability for a specific workplace should be discussed with the producers of the protective gloves.
Protective gloves should be worn when handling freshly made polyurethane products to avoid contact with trace residual materials which may be hazardous in contact with skin.

Use chemical resistant gloves classified under Standard EN374: protective gloves against chemicals and
### Eye protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Chemical splash goggles. Always wear eye protection when the potential for inadvertent eye contact with the product cannot be excluded. Please follow all applicable local/national requirements when selecting protective measures for a specific workplace. Ensure that eyewash stations and safety showers are close to the workstation location.

### Skin and body protection

Impervious clothing

Choose body protection according to the amount and concentration of the dangerous substance at the work place. Recommended:

- Overall (preferably heavy cotton) or Tyvek-Pro Tech 'C',
- Tyvek Pro 'F' disposable coverall.

### Protective measures

Personal protective equipment comprising: suitable protective gloves, safety goggles and protective clothing

The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Ensure that eye flushing systems and safety showers are located close to the working place.

### Hygiene measures

Handle in accordance with good industrial hygiene and safety practice.

Wash face, hands and any exposed skin thoroughly after

---

**Microorganisms**. Examples of glove materials that might provide suitable protection include: Butyl rubber, Chlorinated polyethylene, Polyethylene, Ethyl vinyl alcohol copolymers laminated ("EVAL"), Polychloroprene (Neoprene*), Nitrile/butadiene rubber ("nitrile" or “NBR”), Polyvinyl chloride ("PVC" or "vinyl"), Fluoroelastomer (Viton*).

When prolonged or frequently repeated contact may occur, a glove with protection class of 5 or higher (breakthrough time greater than 240 minutes according to EN374) is recommended.

When only brief contact is expected, a glove with protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN374) is recommended. Contaminated gloves should be decontaminated and disposed of.

Notice: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all requisite workplace factors such as, but not limited to: other chemicals that may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), as well as instructions/specifications provided by the glove supplier.
### Handling
- Remove contaminated clothing and protective equipment before entering eating areas.
- When using do not eat, drink or smoke.
- Contaminated work clothing should not be allowed out of the workplace.
- Wash hands before breaks and immediately after handling the product.
- Wash hands before breaks and at the end of workday.

**Huntsman**

Enriching lives through innovation
Solubility in other solvents: No data is available on the product itself.
Partition coefficient: n-octanol/water: No data is available on the product itself.
Auto-ignition temperature: No data is available on the product itself.
Thermal decomposition: No data is available on the product itself.
Self-Accelerating decomposition temperature (SADT): No data is available on the product itself.
Viscosity: No data is available on the product itself.
Explosive properties: No data is available on the product itself.
Oxidizing properties: No data is available on the product itself.
Particle size: No data is available on the product itself.

SECTION 10. STABILITY AND REACTIVITY

Reactivity: No dangerous reaction known under conditions of normal use.
Chemical stability: Stable under normal conditions.
Possibility of hazardous reactions: Reaction with water (moisture) produces CO2-gas. Exothermic reaction with materials containing active hydrogen groups.
  The reaction becomes progressively more vigorous and can be violent at higher temperatures if the miscibility of the reaction partners is good or is supported by stirring or by the presence of solvents.
  MDI is insoluble with, and heavier than water and sinks to the bottom but reacts slowly at the interface.
  A solid water-insoluble layer of polyurea is formed at the interface by liberating carbon dioxide gas.

Conditions to avoid: Extremes of temperature and direct sunlight.
Exposure to air or moisture over prolonged periods.

Incompatible materials: Acids
Amines
Bases
Metals
water

Hazardous decomposition products: Combustion products may include: carbon monoxide, carbon dioxide, nitrogen oxides, hydrocarbons and HCN. In the event of extreme heat (>500 degrees C), aniline is suspected of being formed.

SECTION 11. TOXICOLOGICAL INFORMATION
Information on likely routes of exposure:

**Acute toxicity**

**Components:**
Poly[oxy(methyl-1,2-ethanediyl)], .alpha.-hydro-.omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:

- **Acute oral toxicity Components**
  - LD50 (Rat, male): > 10,000 mg/kg
  - Method: OECD Test Guideline 401

4,4’-methylenediphenyl diisocyanate:
- **Acute oral toxicity Components**
  - LD50 (Rat, male): > 10,000 mg/kg
  - Method: OECD Test Guideline 401

Diphenylmethanediisocyanate:
- **Acute oral toxicity Components**
  - LD50 (Rat, male): > 10,000 mg/kg
  - Method: OECD Test Guideline 401

**Acute inhalation toxicity - Product**

- Assessment: The substance/mixture is not toxic on inhalation as defined by dangerous goods regulations.
- Acute toxicity estimate: 1.48 mg/l
- Exposure time: 4 h
- Test atmosphere: dust/mist
- Method: Calculation method

**Acute dermal toxicity - Product**

- Acute toxicity estimate: > 5,000 mg/kg
- Method: Calculation method

**Acute toxicity (other routes of administration)**

- No data available

**Skin corrosion/irritation**

**Components:**
Poly[oxy(methyl-1,2-ethanediyl)], .alpha.-hydro-.omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:

- **Species:** Rabbit
- **Assessment:** Irritant
- **Method:** OECD Test Guideline 404
- **Result:** Irritating to skin.

4,4’-methylenediphenyl diisocyanate:
- **Species:** Rabbit
- **Method:** OECD Test Guideline 404
- **Result:** Irritating to skin.

2,4’-methylenediphenyl diisocyanate:
- **Species:** Rabbit
- **Assessment:** Irritant
- **Method:** OECD Test Guideline 404
Result: Irritating to skin.

**Diphenylmethanediisocyanate:**
Species: Rabbit
Assessment: Irritating to skin.
Method: OECD Test Guideline 404
Result: Skin irritation

**Serious eye damage/eye irritation**

**Components:**
Poly[oxy(methyl-1,2-ethanediyl)].alpha.-hydro-.omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:
Species: Rabbit
Result: Mild eye irritation
Assessment: Irritant
Method: No information available.
Remarks: Mild eye irritation largely based on human evidence

4,4'-methylene diphenyl diisocyanate:
Species: Rabbit
Result: Mild eye irritation

2,4'-methylene diphenyl diisocyanate:
Species: Humans
Result: Irritation to eyes, reversing within 7 days
Assessment: Mild eye irritant
Method: OECD Test Guideline 405
Remarks: Mild eye irritation

Diphenylmethane diisocyanate:
Species: Rabbit
Result: Irritation to eyes, reversing within 7 days
Assessment: Mild eye irritant
Method: OECD Test Guideline 405

**Respiratory or skin sensitisation**

**Components:**
Poly[oxy(methyl-1,2-ethanediyl)].alpha.-hydro-.omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:
Exposure routes: Skin
Species: Mouse
Assessment: May cause sensitisation by skin contact.
Result: Causes sensitisation.

Exposure routes: Respiratory Tract
Species: Guinea pig
Assessment: May cause sensitisation by inhalation.
Result: Causes sensitisation.

4,4'-methylene diphenyl diisocyanate:
Exposure routes: Skin
Species: Mouse
Method: OECD Test Guideline 429
Result: May cause sensitisation by skin contact.

Exposure routes: Respiratory Tract
Species: Guinea pig
Result: May cause sensitisation by inhalation.

2,4'-methylene diphenyl diisocyanate:
Exposure routes: Skin
Species: Mouse
Assessment: May cause sensitisation by skin contact.
Result: Causes sensitisation.

Exposure routes: Respiratory Tract
Species: Guinea pig
Assessment: May cause sensitisation by inhalation.
Result: Causes sensitisation.

Diphenylmethanediisocyanate:
Exposure routes: Skin
Species: Guinea pig
Method: OECD Test Guideline 406
Result: May cause sensitisation by skin contact.

Exposure routes: Respiratory Tract
Species: Rat
Result: May cause sensitisation by inhalation.

Components:
Poly[oxy(methyl-1,2-ethanediyl)], .alpha.-hydro-.omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:
Assessment: Mild eye irritation

4,4'-methylene diphenyl diisocyanate:
Assessment: May cause sensitisation by inhalation and skin contact.

2,4'-methylene diphenyl diisocyanate:
Assessment: Mild eye irritation

Diphenylmethanediisocyanate:
Assessment: May cause an allergic skin reaction., May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Germ cell mutagenicity

Components:
Poly[oxy(methyl-1,2-ethanediyl)], .alpha.-hydro-.omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:
Genotoxicity in vitro:
Concentration: 200 ug/plate
Metabolic activation: with and without metabolic activation
Result: negative

4,4'-methylene diphenyl diisocyanate:
Genotoxicity in vitro:
Concentration: 200 ug/plate
Metabolic activation: with and without metabolic activation
SAFETY DATA SHEET

SUPRASEC® 9631 (STI 03-0.15-S HYPERFLEX)

Version 1.1  Revision Date: 05/16/2018  SDS Number: 400001016383  Date of last issue: 02/11/2016

Result: negative

2,4′-methylene diphenyl diisocyanate:
Genotoxicity in vitro: Metabolic activation: with and without metabolic activation
Method: OECD Test Guideline 471
Result: negative

Diphenylmethane diisocyanate:
Genotoxicity in vitro: Concentration: 200 ug/plate
Metabolic activation: with and without metabolic activation
Result: negative

Components:
Poly[oxy(methyl-1,2-ethanediyl)], α-hydro-, ω-hydroxy-, polymer with 1,1′-methylenediisocyanatobenzene:
Genotoxicity in vivo: Application Route: Inhalation
Exposure time: 3 Weeks
Dose: 118 mg/m3
Method: OECD Test Guideline 474
Result: negative

4,4′-methylene diphenyl diisocyanate:
Genotoxicity in vivo: Application Route: Inhalation
Exposure time: 3 Weeks
Dose: 118 mg/m3
Method: OECD Test Guideline 474
Result: negative

2,4′-methylene diphenyl diisocyanate:
Genotoxicity in vivo: Application Route: Inhalation
Exposure time: 3 Weeks
Dose: 118 mg/m3
Method: OECD Test Guideline 474
Result: negative

Diphenylmethane diisocyanate:
Genotoxicity in vivo: Application Route: Inhalation
Result: Not classified due to inconclusive data.
Application Route: Inhalation
Exposure time: 3 Weeks
Dose: 113 mg/m3
Method: OECD Test Guideline 474
Result: negative

Carcinogenicity

Product:
Remarks: Rats have been exposed for two years to a respirable aerosol of polymeric MDI which resulted in a chronic pulmonary irritation at high concentrations. Only at the top level (6 mg/m3), there was a significant incidence of a benign tumour of the lung (adenoma) and one malignant tumour (adenocarcinoma). There were no lung tumours at 1 mg/m3 and no effects at 0.2 mg/m3. Overall, the tumour incidence, both benign and malignant, and the number of animals with the
tumours were not different from controls. The increased incidence of lung tumours is associated with prolonged respiratory irritation and the concurrent accumulation of yellow material in the lung, which occurred throughout the study. In the absence of prolonged exposure to high concentrations leading to chronic irritation and lung damage, it is highly unlikely that tumour formation will occur.

Carcinogenicity - Assessment

IARC

No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

ACGIH

No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.

OSHA

No component of this product present at levels greater than or equal to 0.1% is on OSHA’s list of regulated carcinogens.

NTP

No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

Reproductive toxicity

Components:

2,4'-methylenediphenyl diisocyanate:

Effects on fertility

Species: Rat, female
Application Route: Inhalation
Method: OECD Test Guideline 414
Result: Animal testing did not show any effects on fertility.

Species: Rat, male and female
Application Route: Inhalation
Method: OECD Test Guideline 414
Result: Animal testing did not show any effects on fertility.

Diphenylmethanediisocyanate:

Species: Rat, male and female
Application Route: Inhalation
Method: OECD Test Guideline 414
Remarks: No significant adverse effects were reported

Components:

Poly[oxy(methyl-1,2-ethanediyl)] .alpha.-hydro.-omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:

Effects on foetal development

Species: Rat, male and female
Application Route: Inhalation
Method: OECD Test Guideline 414
Result: No teratogenic effects

4,4'-methylene diphenyl diisocyanate:

Species: Rat, female
Application Route: Inhalation
General Toxicity Maternal: No observed adverse effect level: 4 mg/m³
Method: OECD Test Guideline 414
Result: No teratogenic effects

2,4'-methylene diphenyl diisocyanate:
Species: Rat, male and female
Application Route: Inhalation
General Toxicity Maternal: No observed adverse effect level: 4 mg/m³
Method: OECD Test Guideline 414
Result: No teratogenic effects

Diphenylmethane diisocyanate:
Species: Rat, male and female
Application Route: Inhalation
General Toxicity Maternal: 4 mg/m³
Method: OECD Test Guideline 414
Result: No teratogenic effects

Reproductive toxicity - Assessment: No data available

STOT - single exposure

Components:
Poly[oxy(methyl-1,2-ethanediyl)], ...hydroxy-, polymer with 1,1'-methylenebis(isocyanatobenzene);
Exposure routes: inhalation (dust/mist/fume)
Target Organs: Respiratory Tract
Assessment: The substance or mixture is classified as specific target organ toxicant, single exposure, category 3 with respiratory tract irritation.

4,4'-methylenediphenyl diisocyanate:
Exposure routes: Inhalation
Target Organs: Respiratory Tract
Assessment: May cause respiratory irritation.

2,4'-methylenediphenyl diisocyanate:
Exposure routes: Inhalation
Target Organs: Respiratory system
Assessment: The substance or mixture is classified as specific target organ toxicant, single exposure, category 3 with respiratory tract irritation.

Diphenylmethane diisocyanate:
Exposure routes: Inhalation
Target Organs: Respiratory Tract
Assessment: May cause respiratory irritation.

STOT - repeated exposure

No data available
Repeated dose toxicity

**Components:**
Poly[oxy(methyl-1,2-ethanediyl)], \( \alpha \)-hydro-\( \omega \)-hydroxy-, polymer with 1,1\'-
methylenebis[isocyanatobenzene]:
Species: Rat, male and female
NOEC: 0.2 mg/m3
Exposure time: 2 yr
Number of exposures: 5 d
Method: OECD Test Guideline 453

4,4\'-methylenebibenyl diisocyanate:
Species: Rat, male and female
NOEC: 0.2 mg/m3
Exposure time: 2 yr
Number of exposures: 5 d
Method: OECD Test Guideline 453

2,4\'-methylenebibenyl diisocyanate:
Species: Rat, male and female
NOEC: 0.2 mg/m3
Exposure time: 2 yr
Number of exposures: 5 d
Method: OECD Test Guideline 453

Diphenylmethanediisocyanate:
Species: Rat, male and female
NOEC: 0.2 mg/m3
Test atmosphere: dust/mist
Exposure time: 2 yr
Number of exposures: 5 d
Method: OECD Test Guideline 453

**Components:**
Poly[oxy(methyl-1,2-ethanediyl)], \( \alpha \)-hydro-\( \omega \)-hydroxy-, polymer with 1,1\'-
methylenebis[isocyanatobenzene]:
Repeated dose toxicity - Assessment: Mild eye irritation

Aspiration toxicity
No data available

Experience with human exposure
General Information: No data available
SECTION 12. ECOLOGICAL INFORMATION

Ecotoxicity
Components:
Poly[oxy(methyl-1,2-ethanediyl)][.alpha.-hydro-.omega.-hydroxy., polymer with 1,1'-methylenebis[isocyanatobenzene];
Toxicity to fish : LC50 (Brachydanio rerio (zebrafish)): > 1,000 mg/l
Exposure time: 96 h
Test Type: static test
Method: OECD Test Guideline 203

4,4'-methylenediphenyl diisocyanate:
Toxicity to fish : LC50 (Brachydanio rerio (zebrafish)): > 1,000 mg/l
Exposure time: 96 h
Test Type: static test
Method: OECD Test Guideline 203

2,4'-methylenediphenyl diisocyanate:
Toxicity to fish : LC50 (Brachydanio rerio (zebrafish)): > 1,000 mg/l
Exposure time: 96 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 203

Diphenylmethane diisocyanate:
Toxicity to fish : LC50 (Brachydanio rerio (zebrafish)): > 1,000 mg/l
Exposure time: 96 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 203

LC0: > 1,000 mg/l
Exposure time: 96 h

**Components:**

Poly[oxy(methyl-1,2-ethanediyl)], .alpha.-hydro.-omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:

Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): > 1,000 mg/l
Exposure time: 24 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 202

4,4'-methylenediphenyl diisocyanate:

Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): > 1,000 mg/l
Exposure time: 24 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 202

2,4'-methylenediphenyl diisocyanate:

Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): > 1,000 mg/l
Exposure time: 24 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 202

Diphenylmethanediisocyanate:

Toxicity to algae : EC50 (Desmodesmus subspicatus (green algae)): > 1,640 mg/l
Exposure time: 72 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 201

M-Factor (Acute aquatic toxicity) : No data available

Toxicity to fish (Chronic toxicity) : No data available

**Components:**

Poly[oxy(methyl-1,2-ethanediyl)], .alpha.-hydro.-omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:

Toxicity to daphnia and other : NOEC (Daphnia magna (Water flea)): >= 10 mg/l
aquatic invertebrates
(Chronic toxicity)
Exposure time: 21 d
Test Type: semi-static test
Test substance: Fresh water
Method: OECD Test Guideline 211

4,4’-methylene diphenyl diisocyanate:
Toxicity to daphnia and other aquatic invertebrates
(Chronic toxicity)
: NOEC (Daphnia magna (Water flea)): >= 10 mg/l
Exposure time: 21 d
Test Type: semi-static test
Test substance: Fresh water
Method: OECD Test Guideline 211

2,4’-methylene diphenyl diisocyanate:
Toxicity to daphnia and other aquatic invertebrates
(Chronic toxicity)
: NOEC (Daphnia magna (Water flea)): >= 10 mg/l
Exposure time: 21 d
Test Type: semi-static test
Test substance: Fresh water
Method: OECD Test Guideline 211

Diphenylmethanediisocyanate:
Toxicity to daphnia and other aquatic invertebrates
(Chronic toxicity)
: NOEC (Daphnia magna (Water flea)): >= 10 mg/l
Exposure time: 21 d
Test Type: semi-static test
Test substance: Fresh water
Method: OECD Test Guideline 211

M-Factor (Chronic aquatic toxicity)
: No data available

Components:
Poly[oxy(methyl-1,2-ethanediyl)], alpha-hydro-omega-hydroxy-, polymer with 1,1’-methylenebis(isocyanatobenzene):
Toxicity to microorganisms
: EC50 (activated sludge): > 100 mg/l
Exposure time: 3 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 209

2,4’-methylene diphenyl diisocyanate:
Toxicity to microorganisms
: EC50 (activated sludge): > 100 mg/l
Exposure time: 3 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 209

Diphenylmethanediisocyanate:
Toxicity to microorganisms
: EC50 (activated sludge): > 100 mg/l
Exposure time: 3 h
Test Type: static test
Test substance: Fresh water
Method: OECD Test Guideline 209

Components:
Poly[oxy(methyl-1,2-ethanediyl)], alpha-hydro-omega-hydroxy-, polymer with 1,1’-methylenebis(isocyanatobenzene):
### Toxicity to soil dwelling organisms

- **4,4’-methylene diphenyl diisocyanate:**
  - NOEC (Eisenia fetida (earthworms)): \( \geq 1,000 \text{ mg/kg} \)
  - Exposure time: 336 h
  - Method: OECD Test Guideline 207

- **2,4’-methylene diphenyl diisocyanate:**
  - NOEC (Eisenia fetida (earthworms)): \( \geq 1,000 \text{ mg/kg} \)
  - Exposure time: 336 h
  - Method: OECD Test Guideline 207

- **Diphenylmethane diisocyanate:**
  - EC50 (Eisenia fetida (earthworms)): \( > 1,000 \text{ mg/kg} \)
  - Exposure time: 336 h
  - Method: OECD Test Guideline 207

### Plant toxicity

- No data available

### Sediment toxicity

- No data available

### Toxicity to terrestrial organisms

- No data available

### Ecotoxicology Assessment

- **Acute aquatic toxicity:** No data available

- **Chronic aquatic toxicity:** No data available

- **Toxicity Data on Soil:** No data available

### Persistence and degradability

**Components:**

**Poly[oxy(methyl-1,2-ethanediyl)]._alpha._hydro-_omega._hydroxy_, polymer with 1,1’-methylenebis[isocyanatobenzene]:**

**Biodegradability**

- Inoculum: Domestic sewage
  - Concentration: 30 mg/l
  - Result: Not biodegradable
  - Biodegradation: 0 %
  - Exposure time: 28 d
  - Method: Inherent Biodegradability: Modified MITI Test (II)

**4,4’-methylene diphenyl diisocyanate:**

**Biodegradability**

- Inoculum: Domestic sewage
  - Concentration: 30 mg/l
  - Result: Not biodegradable
  - Biodegradation: 0 %
  - Exposure time: 28 d
  - Method: Inherent Biodegradability: Modified MITI Test (II)
2,4’-methylene diphenyl diisocyanate:
Biodegradability: Inoculum: Domestic sewage
Concentration: 30 mg/l
Result: Not biodegradable
Biodegradation: 0 %
Exposure time: 28 d
Method: Inherent Biodegradability: Modified MITI Test (II)

Diphenylmethanediisocyanate:
Biodegradability: Inoculum: Domestic sewage
Concentration: 30 mg/l
Result: Not biodegradable
Biodegradation: 0 %
Exposure time: 28 d
Method: Inherent Biodegradability: Modified MITI Test (II)

Biochemical Oxygen Demand (BOD):
: No data available

Chemical Oxygen Demand (COD):
: No data available

BOD/COD:
: No data available

ThOD:
: No data available

BOD/ThOD:
: No data available

Dissolved organic carbon (DOC):
: No data available

Physico-chemical removability:
: No data available

Components:
4,4’-methylene diphenyl diisocyanate:
Stability in water:
Degradation half life(DT50): 20 hrs (77 °F / 25 °C)
Remarks: Fresh water

Diphenylmethanediisocyanate:
Stability in water:
Degradation half life(DT50): 0.8 d (77 °F / 25 °C)
Method: No information available.
Remarks: Fresh water

Photodegradation:
: No data available

Impact on Sewage Treatment:
: No data available
Bioaccumulative potential

Components:
Poly[oxy(methyl-1,2-ethanediyl)], alpha.-hydro.-omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:
Bioaccumulation:
Species: Cyprinus carpio (Carp)
Bioconcentration factor (BCF): 200
Remarks: Bioaccumulation is unlikely.

4,4’-methylene diphenyl diisocyanate:
Bioaccumulation:
Species: Cyprinus carpio (Carp)
Bioconcentration factor (BCF): 200
Remarks: Bioaccumulation is unlikely.

2,4’-methylene diphenyl diisocyanate:
Bioaccumulation:
Species: Cyprinus carpio (Carp)
Bioconcentration factor (BCF): 200
Remarks: Bioaccumulation is unlikely.

Diphenylmethane diisocyanate:
Bioaccumulation:
Species: Cyprinus carpio (Carp)
Bioconcentration factor (BCF): 200
Remarks: Bioaccumulation is unlikely.

Components:
Poly[oxy(methyl-1,2-ethanediyl)], alpha.-hydro.-omega.-hydroxy-, polymer with 1,1'-methylenebis[isocyanatobenzene]:
Partition coefficient: n-octanol/water
log Pow: 4.51 (68 °F / 20 °C)
pH: 7
Method: OECD Test Guideline 117

4,4’-methylene diphenyl diisocyanate:
Partition coefficient: n-octanol/water
log Pow: 4.51 (68 °F / 20 °C)
pH: 7
Method: OECD Test Guideline 117

2,4’-methylene diphenyl diisocyanate:
Partition coefficient: n-octanol/water
log Pow: 4.51 (68 °F / 20 °C)
pH: 7
Method: OECD Test Guideline 117

Mobility in soil
Mobility: No data available
Distribution among environmental compartments: No data available
Stability in soil: No data available

Other adverse effects
Environmental fate and pathways: No data available
Results of PBT and vPvB: No data available
assessment

Endocrine disrupting potential : No data available

Adsorbed organic bound halogens (AOX) : No data available

**Hazardous to the ozone layer**

Ozone-Depletion Potential : Regulation: 40 CFR Protection of Environment; Part 82 Protection of Stratospheric Ozone - CAA Section 602 Class I Substances
Remarks: This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

Additional ecological information : No data available

Global warming potential (GWP) : No data available

**SECTION 13. DISPOSAL CONSIDERATIONS**

**Disposal methods**

Waste from residues : Do not dispose of waste into sewer.
Do not contaminate ponds, waterways or ditches with chemical or used container.
Send to a licensed waste management company.

Contaminated packaging : Empty remaining contents.
Dispose of as unused product.
Do not re-use empty containers.

**SECTION 14. TRANSPORT INFORMATION**

**International Regulations**

**IATA**
Not regulated as dangerous goods

**IMDG**
Not regulated as dangerous goods

**Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code**
Not applicable for product as supplied.

**National Regulations**
DOT Classification
UN/ID/NA number : NA 3082
Proper shipping name : OTHER REGULATED SUBSTANCES, LIQUID, N.O.S.
(Methylene Diphenyl Diisocyanate)
Class : 9
Packing group : III
Labels : CLASS 9
ERG Code : 171
Marine pollutant : no

Special precautions for user
The transport classification(s) provided herein are for informational purposes only, and solely based upon the properties of the unpackaged material as it is described within this Safety Data Sheet. Transportation classifications may vary by mode of transportation, package sizes, and variations in regional or country regulations.

SECTION 15. REGULATORY INFORMATION

EPCRA - Emergency Planning and Community Right-to-Know Act

SARA 311/312 Hazards
Acute toxicity (any route of exposure)
Skin corrosion or irritation
Serious eye damage or eye irritation
Respiratory or skin sensitisation
Specific target organ toxicity (single or repeated exposure)

SARA 313
The following components are subject to reporting levels established by SARA Title III, Section 313:

<table>
<thead>
<tr>
<th>Components</th>
<th>CAS-No.</th>
<th>Reporting Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>4,4'-methylene diphenyl diisocyanate</td>

California Prop. 65
This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.
The components of this product are reported in the following inventories:

- **CH INV**: The formulation contains substances listed on the Swiss Inventory, or in compliance with the inventory.
- **DSL**: All components of this product are on the Canadian DSL.
- **AICS**: Not in compliance with the inventory.
- **NZIoC**: Not in compliance with the inventory.
- **ENCS**: Not in compliance with the inventory.
- **KECI**: On the inventory, or in compliance with the inventory.
- **PICCS**: Not in compliance with the inventory.
- **IECSC**: On the inventory, or in compliance with the inventory.
- **TCSI**: Not in compliance with the inventory.
- **TSCA**: On the inventory, or in compliance with the inventory.

**Inventories**

AICS (Australia), DSL (Canada), IECSC (China), REACH (European Union), ENCS (Japan), ISHL (Japan), KECI (Korea), NZIoC (New Zealand), PICCS (Philippines), TCSI (Taiwan), TSCA (USA)

**TSCA - 5(a) Significant New Use Rule List of Chemicals**
No substances are subject to a Significant New Use Rule.

**US. Toxic Substances Control Act (TSCA) Section 12(b) Export Notification (40 CFR 707, Subpt D)**
No substances are subject to TSCA 12(b) export notification requirements.

**SECTION 16. OTHER INFORMATION**

**Further information**

**NFPA 704:**

<table>
<thead>
<tr>
<th>Health</th>
<th>Flammability</th>
<th>Reactivity</th>
<th>Special hazard</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1</td>
<td>2</td>
<td>0</td>
</tr>
</tbody>
</table>

**HMIS® IV:**

- **HEALTH**: *
- **FLAMMABILITY**: 1
- **PHYSICAL HAZARD**: 0

HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. The *** represents a chronic hazard, while the */” represents the absence of a chronic hazard.

Liquid decontaminants (percentages by weight or volume):

Decontaminant 1: *- sodium carbonate : 5 - 10 %  *- liquid detergent : 0.2 - 2 %  *- water : to make up to 100 %

Decontaminant 2: *- concentrated ammonia solution : 3 - 8 %  *- liquid detergent : 0.2 - 2 %  *- water : to make up to 100 %
Decontaminant 1 reacts slower with diisocyanates but is more environmentally friendly than decontaminant 2.
Decontaminant 2 contains ammonia. Ammonia presents health hazards. (See supplier safety information.)
