

TRENCHLESS PIPE REHABILITATION

SOURCE ONE LININGS

CIPP lateral lining consumables

S1E offers lateral lining consumables for trenchless sewer repairs from 2" to 8". The inversion process utilizes a felt liner with an epoxy resin to provide a jointless repair, allowing you to rehabilitate just a small portion of pipe or a run up to 450 ft. Our materials can be cured with ambient temperatures or hot water. When complete, our products provide a smooth transition to the pipe and create a structural barrier against exterior elements.
