

Source 1 Environmental's PipePatch division has been recognized by ICC-ES for meeting their high standards and code requirements. PipePatch continues to grow and develop a standardization of materials that are used and depended upon exclusively for successful and repeatable results in both commercial and residential markets.

PipePatch products are comprised of a Cured-In-Place, Point Repair System. This system consists of components tested and listed to NSF 14 and NSF SE 10990. The liner material is 100% fiberglass that is consisted of a knitted biaxial and chopped strand composite, saturated with a proprietary silicate resin which, when mixed is totally inert and non-toxic. After mixing, resin shall be yellow in color which when applied to a white fiberglass mat that will serve as visual aid to an installer to ensure total and complete saturation, which equates to a standardized process.

#### **What sets the ICC-ES PMG Listing Program apart from the competition?**

- Broader acceptance in North America (ICC has over 50,000 members, of which 11,000 are building and plumbing officials who look for the ICC-ES PMG mark)
- The International Plumbing Code is published by ICC, the parent company of ICC-ES. The code requires that plumbing products be certified.
- Inspectors rely on ICC-ES PMG listings because of the quality of the review conducted ICC-ES PMG engineers.
- GREEN: Helps you meet the requirements of the IGCC, CALGreen, ASHRAE, USGBC LEED, GBI Green Globes, and more

#### **Compliance with the following codes:**

- 2012 and 2009 International Plumbing Code®
- (IPC) 2012 and 2009 International Residential Code®
- (IRC) 2012 and 2009 Uniform Plumbing Code®
- (UPC)\*
  - \*Uniform Plumbing Code is a copyrighted publication of the International Association of Plumbing and Mechanical Officials

#### **Compliance with the following standards:**

- NSF 14, Plastic Piping System Components and Related Materials. NSF SE 10990, Special Engineered Specification for Rehabilitation by Point Repair of Existing Pipe
